Emerald Open Research: Article Processing Charges

All content published on Emerald Open Research is fully Open Access immediately upon publication. The publication costs are covered through article processing charges (APCs).

APCs in Emerald Open Research are based on word counts, irrespective of the article type. Article word counts will be calculated for the main body, i.e. excluding the title, abstract, tables, figure and data legends, and references. A discretionary 10% may be allowed to account for different word-counting methods and small additions that may be requested by the editorial team during the pre-publication checks. If significant changes are required prior to publication (e.g. if compulsory article sections were missing), the article's banding (and hence fee) may have to be adjusted. APCs are only charged for articles that pass the pre-publication checks and are published.

WORD COUNT	PRICE *
up to 5000 words	US \$1200
5000-8000 words	US \$1500
8000-15000 words [#]	US \$2500

UK customers will also be subject to pay VAT on these fees under UK & EU VAT rules.

* Data hosting costs: When authors upload their datasets onto a data repository, they may be charged by the repository if the data files exceed certain size limit (for details, please see our [Data Guidelines](#)).

[#]For articles that are longer than 15,000 words, please [contact us](#).
